nextern® Labeling Platform

A powerful end-to-end labeling automation solution to meet the rigorous demands of regulated industries.

nextLEAP

Our **L**abeling **E**nterprise **A**utomation **P**latform is a powerful end-to-end labeling automation solution designed to eliminate manual errors, streamline complex printing workflows, and reduce operational overhead in our manufacturing environments. LEAP automates label creation and printing by integrating seamlessly with our ERP and leveraging industry-standard tools like BarTender.

Labeling is the 5th most common reason why medical devices get recalled

LEAP IN ACTION

LEAP empowers our teams with advanced features such as configurable multi-label workflows (e.g., enforcing sequence-specific label printing per SKU), dynamic label data and image retrieval and robust reprinting capabilities. The platform drastically reduces the number of label templates required during our manufacturing and ensures full traceability with audit logs and error tracking, giving our teams the visibility and control they need to maintain quality and compliance.

WHY LEAP?

✓ **Accelerate Labeling Processes**

✓ **Minimize Human Error**

✓ **Maintain Lean Label Design Footprint**

✓ **Ensure Regulatory Traceability and Production Efficiency**
